How to play Sudoku

- Fill every empty square with a number.
- In a 4 × 4 puzzle use the numbers 1 to 4; in a 6 × 6 puzzle use 1 to 6.
- Each row, each column and each box with a thick border must have every number once.
- Look for a row, column or box with only one empty square: the missing number goes there.
- Every puzzle has exactly one answer. The answers are at the back of the book.
